HOBBIES

EXPERIENCE

Full-Stack Developer, Propulsion Academy

MAY 2019 - AUGUST 2019 (3 MONTHS), ZURICH

- Developed Full-Stack web applications using React, Django, Postgres and Docker.
- Experienced working as a team in a Gitlab CI/CD environment
- Final Project:** Made on behalf of a company. It's a social video sharing platform where users can upload videos and reply to them with videos. Developed with a team of 3 during 2.5 weeks (see Presentation).
The project required us to learn new technologies on the fly like: WebRTC for recording, a CDN provider for distribution and Traefik as a reverse proxy.

Hobby Developer

FEBRUARY 2015 - MAY 2019 (4 YEARS 3 MONTHS)

- Created games with UE4 using C++ and blueprint visual scripting. Made some of my_projects open-source and helped people implement relatively complex game mechanics.
- Used HTML, CSS and pure JavaScript to create responsive websites.
- Developed simple backend APIs with Express, MongoDB and OAuth.

Electroplater, Max Mitschjeta AG

JANUARY 2017 - MAY 2019 (2 YEARS 5 MONTHS), GOSSAU SG

- Substitute supervisor in a team of four where we used electrolysis to treat metal.
- Coordinated work and delegated tasks to successfully meet deadlines. Advised Customers.

EDUCATION

Full-Stack Web Developer Bootcamp

MAY 2019 - AUGUST 2019 (3 MONTHS), ZURICH

- Spent ~750h in 12 weeks bootstrapping my Web Developer career at Propulsion Academy.

Self Teaching

FEBRUARY 2015 - MAY 2019 (4 YEARS 3 MONTHS)

- Spent ~2000-3000h across 4 years acquiring the relevant skills of a developer.
- Books studied:** You don't know JS 1-3 Eloquent JavaScript Effective JavaScript Data Structures & Algorithms with JS RESTful Web APIs But How Do It Know? Code Game Programming Patterns How Software works
- video courses completed:** ES6: Complete Developer's Guide (6h). JavaScript: Weird Parts (11h). Advanced Javascript (3.5h). HTML5 Mastery (14h). Various Treehouse Courses (~30h). Learn NodeJS (13h). C++ beginner course (18h). UE4 C++ Developer (43h).
